LUZERN

Dear Members,

The **2026 Scientific Meeting** will take place on **November 20, 2026**, in Lucerne. Registration is now open. The detailed program is currently being finalized.

We warmly invite all members to present their ongoing or completed research projects, as well as interesting clinical cases. Projects that have already been presented at other conferences, such as AEPC 2026 in Padua, DGPK 2026 in Cologne, or other scientific meetings, are also welcome to be submitted again.

The presentation format will be determined flexibly based on the number of submissions, with the aim of giving as many participants as possible the opportunity to present their work. We particularly encourage submissions from **Junior Members and Fellows**.

Registration and abstract submission is possible via **luks.ch/sgpk-meeting**. If you have any questions, please contact **PD Dr. med. Martin Christmann at martin.christmann@luks.ch**.

We would also appreciate it if you could forward this invitation within your institution and encourage your colleagues and team members to participate.

We look forward to seeing you in Lucerne.

On behalf of the Scientific Organizing Committee,
Sebastiano Lava and Martin Christmann
