3rd Lucerne Shoulder Course

Instructional Course
Hands-On Cadaver Workshop

herzlich, kompetent, vernetzt

Dear Colleagues & Shoulder Specialists

We are delighted to welcome you to the 3rd Lucerne Shoulder Course and to continue our commitment to high-quality, practice-oriented education in shoulder surgery. This two-day course combines the latest evidence with contemporary surgical techniques through expert lectures, interactive case discussions, and extensive hands-on training.

Day 1 focuses on advanced shoulder arthroscopy, including instability, rotator cuff pathology, and selected nerve procedures. Participants will practice modern arthroscopic techniques under the guidance of an experienced international faculty.

Day 2 is dedicated to the treatment of proximal humerus fractures and fracture sequelae. Using fresh-frozen cadaver specimens in our state-of-the-art Skills Lab, participants will gain hands-on experience with contemporary osteosynthesis and shoulder arthroplasty techniques. New this year, an interactive Trauma Battle will encourage discussion of complex fracture cases, treatment strategies, and surgical decision-making.

To ensure maximum interaction and individual feedback, participant numbers remain limited, enabling close collaboration with faculty and a highly interactive learning environment.

We sincerely thank our faculty, industry partners, and participants for making the Lucerne Shoulder Course a valuable educational platform. We look forward to welcoming you to Lucerne!
